Summary

Frontend Developer with a BSc in Computer Science and 3+ years of commercial experience building React/TypeScript SPAs. Started as a frontend developer at Coddu and after six months moved into a Project Coordinator role, leading a commercial education platform: planning work, assigning tasks across a team of 6 and supporting the founder. Delivered 5 commercial SPAs, worked in Scrum teams at AASSolutions, and now build SPAs and landing pages from Figma for freelance clients. Strong at turning requirements into clear tasks, documentation and consistent code standards.

Education & Certifications

2022 – 2025	Technical University of Košice	BSc Computer Science
2024 – 2025	Mate Academy	Frontend Course
2024	FreeCodeCamp / Scrimba React	Certifications

Work experience

Oct 2025 – Present — **Freelance Frontend Developer**

Self-employed · Remote · Clients via Freelancehunt and Malt

- Built 8 responsive SPAs and landing pages from Figma mockups using React, TypeScript, Angular and Node.js for clients in e-commerce, education;
- Gathered requirements, defined the scope of work, and communicated directly with clients from the start of the project through its completion and ongoing support.
- Implemented state management using Redux Toolkit and integrated REST APIs.

Feb – Sep 2025 — **Junior Frontend Developer**

AASSolutions, a.s. · IT consultancy delivering custom internal business platforms for a range of clients

- Built UI components and SPA features from Figma mockups within existing design systems.
- Integrated frontend with backend services via REST API and SOAP.
- Implemented filtering, pagination and form validation for internal business tools used by client teams.
- Worked daily with analysts, designers and backend developers in a Scrum team of 5–6.

Coddu · Web platform for the education sector, team of 6

Mar 2024 – Feb 2025 — **Project Coordinator**

- Led day-to-day project management of a commercial education platform: planned work, prioritised tasks and tracked progress for a team of 6 (developers, designers, testers).
- Distributed tasks across the team and kept delivery on schedule from specification to launch.
- Worked directly with the founder: translated business goals into tasks, prepared priorities and kept them informed on progress.
- Coordinated code reviews, testing and releases between developers, designers and QA.
- Maintained documentation for internal processes and integrations.

Coddu · Web platform for the education sector, team of 6

Aug 2023 – Feb 2024 **Frontend Developer**

- Delivered 5 commercial SPAs, including a course catalogue, student dashboard, admin panel and payment portal, with responsive, cross-browser interfaces for desktop and mobile.
- Integrated REST APIs and WebSockets for course content, progress tracking and real-time notifications.
- Proposed and introduced frontend standards (ESLint, Prettier, SCSS module conventions, component naming) that made code reviews faster and the codebase more consistent.
- Took part in architecture discussions and code reviews with the team.

Personal Projects

Apple Catalog React · TypeScript · SCSS modules

Product catalogue with search, filtering, sorting and pagination; cart and selected items managed with React Context and persisted across sessions. Responsive from 330 to 1440 px.

Live demo · GitHub

Sweeties Angular 17 · TypeScript · SCSS

Pastry shop app with a dessert catalogue, product pages, a step-by-step dessert builder and a shopping cart with checkout. Uses Angular Router, Reactive Forms and a modular component architecture.

Live demo · GitHub

2048 Game JavaScript · HTML · SCSS

Browser version of 2048 in vanilla JavaScript: tile movement and merging, scoring, win/lose detection and keyboard controls, without frameworks.

Live demo · GitHub

Bang & Olufsen and Crazy Baby landing pages HTML · CSS (Flexbox, Grid)

Two responsive landing pages built from Figma mockups in semantic HTML and CSS only, without JavaScript or frameworks.

CrazyBaby · GitHub / B&O · GitHub

Skills

CORE	React, TypeScript, JavaScript, Redux Toolkit
STYLING	SCSS / Sass, CSS3, BEM, Tailwind, Material UI
APIS & RUNTIME	REST API, SOAP, WebSockets, Node.js
OTHER FRAMEWORKS	Angular, Vue
BACKEND & AI	Python, FastAPI, SQL, Docker, LLM / ChatGPT API
TOOLS	Git, Vite, Webpack, ESLint, Prettier
LANGUAGES	Ukrainian (native), English (B2+), Slovak (C1), Dutch (A2)

Hackathons

Deutsche Telekom · 2024 · Team lead · 5th place

Led a team in building an LLM-powered tool with a visual interface that classifies an uploaded dataset, organises it into a hierarchy of smaller datasets and speeds up answering queries.

Python, React, FastAPI, LLM

GymBeam · 2024

Developed an AI shopping assistant based on the company's product data to help customers find and choose products.

Python, React, Jupyter, Keboola, LLM

Deutsche Telekom · 2023

Explored and built a custom ChatGPT-based solution in the first year of the generative AI boom.

Python, Angular, ChatGPT API, FastAPI, LLM

Hobbies

Reading · Pilates · Strength training · Photography · Walking
