My objective

A developer with 2.5+ years of commercial experience building responsive, scalable SPAs using React, TypeScript, and Node.js. I have participated in 4–6 production projects as part of cross-functional teams of 5–6 people, working closely with backend, design, and QA specialists. I prioritize clean code, a well-structured component architecture, and a smooth user experience across different browsers and devices. I hold a bachelor's degree in computer science, which combines a solid theoretical foundation with practical experience in product development. I am currently seeking a position as a Full-Stack or Frontend Developer where I can continue to grow technically and contribute to the creation of high-quality products for users.

Education

2023 – 2025	Technical University of Košice	BSc. Computer Science
2024 – 2025	Mate Academy	Frontend Course

Certifications

2023 – 2025	Technical University of Košice	Diploma
2024 – 2025	Mate Academy	Certifications
2024	FreeCodeCamp	Certified
2024	Scrimba React	Certified

Work experience

Jun 2025 – Present

Self-employed

Freelance Full-Stack Developer

Is a self-directed freelance practice where I work independently with individual clients rather than as part of a larger internal team. Contains just me, taking on the full range of responsibilities normally split across a team — from client communication and scoping to implementation and delivery. The focus of the work lies in building frontends for SPAs and landing pages based on Figma mockups, tailored to each client's specific business needs and brand.

- Building responsive frontend interfaces for SPAs and landing pages based on Figma mockups.
- Communicating directly with clients to gather requirements and clarify scope.
- Choosing and implementing the appropriate stack (React, Angular, Node.js) per project.
- Managing state with Redux Toolkit and integrating with backend services via REST APIs.

Feb – Jun 2025

AASSolutions, a.s.

Junior Frontend Developer

Is an organization that provides IT consultancy services, delivering custom software solutions for internal business platforms to a range of clients. Contains small, cross-functional project teams of 5–6 people — developers, QA engineers, and a project lead — working directly alongside client-side analysts, designers, and backend teams.

- Building UI components and SPA features based on Figma mockups, following established design systems.
- Integrating the frontend with backend services via REST API and SOAP.
- Implementing filtering, pagination, and form validation for internal business tools used by client teams.
- Collaborating daily with analysts, designers, and backend developers in an Agile (Scrum) workflow.

August 2023 – Feb 2025

Coddu

Frontend Developer

This is a small organization that has created a commercial web platform for the education sector. It employs a cross-functional project team of six people—developers, designers, and testers—who work closely together at every stage, from developing the technical specifications to launch.

- Contributing to the UI of 5 commercial SPAs (course catalogue, student dashboard, admin panel, payment portal).
- Integrating REST APIs for course content, progress tracking, and real-time notifications via WebSockets.
- Collaborating closely with 2 other developers through weekly code reviews and joint architectural decisions.
- Proposing and rolling out frontend code standards (ESLint + Prettier, SCSS module conventions, component naming) adopted across team projects.
- Ensuring responsive, cross-browser UI across desktop and mobile for all delivered products.

Skills

CORE	React, TypeScript, JavaScript, Redux, Toolkit
STYLING	SCSS / Sass, CSS3, BEM, Tailwind, Material UI
APIS & RUNTIME	REST API, WebSockets, Node.js, FastAPI
ALSO	Angular, Vue
TOOLS	Git, Vite, Webpack, ESLint, Prettier
FAMILIAR WITH	Python, SQL, Docker
LANGUAGES	Ukrainian (native), English (B2+), Slovak (C1), Dutch (A2)

Competences

QUICK LEARNER	I pick up new technologies quickly — e.g., taught myself C in six months and built a full-fledged game.
ADAPTABILITY	I easily adapt to new technologies and work environments, paying close attention to detail.
CROSS-FUNCTIONAL SKILLS	I have experience working closely with backend developers, designers, and QA specialists
ATTENTION TO DETAIL	I pay special attention to code quality and UI.
COMMUNICATION SKILLS	I easily find common ground with colleagues from various fields—from backend developers to designers and clients.

Hobbies

Reading · Pilates · Strength training
